bespoke kitchens

***de manincor***

ITALIAN MASTERPIECES SINCE 1828

“For 5 generations  
we’ve practiced  
a form of art:  
producing kitchens  
in which innovative  
technology and  
artisanal care coexist  
in harmony”

---

Walter de Manincor

Ceo

# Where craftsmanship and industry meet

---

DeManincor is synonymous with tradition and innovation.

Guaranteed exclusive quality due to a unified synergy between  
traditional artisan technique and the innovative capacity of  
industrial work.

Each of our products proudly beholds the promise of Italian  
excellence and is made in our factory in Trento with the same care  
and passion founded over 180 years ago.

We are a modern, technically advanced industrial reality, always  
ready to face new challenges thanks to centuries-old secrets of  
artisan traditional.

“We fulfill even  
the most particular  
requests because we  
don’t like to limit our  
customers. A passion  
that traces back to  
1828”

# Aesthetics and functionality without compromise

---

We internally design and produce all of our kitchens, using strictly artisanal techniques in which every single component is carefully studied, creating products that are at once exclusive and in line with the style and needs of the user.

From cooking ranges to ventilation systems to solutions for freezing and conservation, each of our kitchens possess a harmonious balance of form and functionality consenting us not only to satisfy the most detailed requests but to make our way into the hearts of our customers.

With DeManincor, beauty and efficiency are part of the home.

# We give our clients and designers the freedom to imagine a world without limits

---

The meeting point between experience in great kitchens and the artisanal background of our company gives way to Bespoke Kitchens, a studied line for the gourmet connoisseur.

Imagine being able to choose dimensions, furnishings, color and equipment for a one-of-a-kind kitchen, unique and unrepeatable.

A kitchen that is elegant on the outside and technical on the inside.

A kitchen perfectly realized down to the minutest detail, stemming from innovative and revolutionary design. A kitchen that allows you to cook at home with the same professional technique and composition of the greatest restaurants.

Cooking ranges, islands, peninsulas or entire kitchens. The solutions are endless, capable of turning your wildest dreams into reality.

From the first site inspection to the finished product, our special commissions result in an exclusive experience for you, and for your idea of perfection.

...

Unmistakable design,  
Glossy Brass trim  
paired with warm  
tones of Chocolate  
Brown and spacious  
dimensions. A  
refined way of  
integrating luxury  
and functionality in  
the heart of Moscow.

# Frytops in cast iron or Teppanyaki

---

Positioned inside a watertight basin that allows for easy cleaning at the end of use, the Gas frytop for direct cooking is heated by a special burner extended by 4.4kW of power in order to distribute the temperature over the entire surface and ensure homogeneous cooking.

There are 2 models of Gas frytop: the Japanese Teppanyaki, perfectly smooth in polished stainless steel and the reversible (double faced) smooth/ribbed finish in black enameled cast iron.

The smooth/ribbed Frytop is also available as an electric frytop.

In London, pastel  
nuances, wide  
open spaces and  
plentiful light for a  
kitchen that blends  
aesthetic quality  
with functionality.  
For those who seek  
to brighten gray city  
days.

# Traditionally innovative

---

DeManincor kitchens can also include traditional wood burning ranges.

These machines, certified and tested according to the most rigorous European norms, are realized with modern fireboxes in cement refractory bricks that allow the kitchen to accumulate heat and gradually disperse warmth throughout the room.

The enameled oven of the wood burning kitchen and the cast iron plate are ideal for traditional culinary preparations, increasingly appreciated and researched.

Large drawers allow for order in the kitchen.

The stainless steel plate of the wood kitchen is considered without a doubt the antithesis to the modern Coup-de-Feu solid tops.

A combination of the highest performing elements of the professional modern kitchen, from the powerful Gas burners to the electric and induction burners.

An Italian in Paris.  
Satin Copper and  
Glossy Copper  
alternate in a play  
on textures and  
finishes for a result  
that is très chic.

# Professional burners

---

Our Gas burners have a power potential of up to 6kW and, excluding the small burner (2kW), are all composed of double rings. The composition of burners and their powers can be customized for each element of cooking.

The burners are watertight and immersed in a large, indented collection tank equipped with a drain for quick and easy cleaning at the end of service.

The Coup-de-Feu solid top has a vertical flame to enhance the functions of the cast iron surface. Thanks to a simple adapter, it lends itself perfectly to Wok cooking.

Like a dive into the  
turquoise waters of  
Saint-Tropez, this  
kitchen perfectly  
interprets the  
nautical style of the  
Côte d'Azur.

# Fine dining appliances

---

The smooth Teppanyaki electric plate is made of stainless steel with a perimeter channel for running water.

This feature is dually functional: on one hand, it simplifies cleaning at the end of service while also acting as a formidable thermal break between the frytop and the work surface.

The plate guarantees an extremely precise temperature thanks to digital regulation and two special probes.

A breathtaking  
view of Milan for  
an open kitchen  
with a sophisticated  
design in chromatic  
and materialistic  
harmony with the  
environment.

# Steamer or Pasta Cooker?

---

A tried and true professional 13lt Pasta Cooker with two robust detachable straining baskets capable of managing large quantities of pasta of any shape and size. The baskets contain a fine grid for straining even the most delicate of pastas.

The same Pasta Cooker, thanks to the technology of DeManincor, can be used as a Steamer by varying the water levels and using the overlapping GN 2/3 baskets (h6cm and h15cm) which allow for simultaneous cooking. During cooking, the device is coverable by a glass lid.

When not in use, a stainless steel cover fits perfectly in line with the cooking surface hiding the Pasta Cooker and creating a workspace while protecting the equipment.

An innovative and  
creative project  
for lovers of  
unconventional design.  
In South Beach, Black  
Velvet tones with trim  
in Glossy Black for a  
contrast suitable to  
true connoisseurs.

# Low and slow

---

The solid top is made of heavy cast iron with a central circular burner and a powerful 4.4kW burner.

Excellent for preparations at low, constant temperatures (plaque de mijotage), ideal for better managing stand-by situations, and moreover useful for when you need to accelerate cooking by taking advantage of the “firing point” of the central vertical flame burner, the so-called Coup-de-Feu.

As in a large professional kitchen, the solid top is inserted together with Gas burners, inside a shallow basin designed to easily manage cleaning at the end of use thanks to a convenient drain.

In order to take full advantage of the entire surface area and avoid boil overs, the plate is at the same height as the side burner grills.

# Cooking ranges at the heart of the kitchen

---

Cooking ranges are at the center of the DeManincor kitchen; the beating heart of each one of our projects.

Innovative, state-of-the-art, and functional in design, the Bespoke Kitchen cooking ranges are special products that become integral pieces in other kitchens and inside DeManincor kitchens.

# Technology at service to your cooking

---

Each of our kitchens is the result of years of technological research and experimentation that have allowed us to idealize and perfect countless solutions regarding each individual element.

From the "Coup-de-Feu" solid tops to the multifunctional ones, from the Pasta Cookers to the dish warmer positioned centrally next to the oven.

All of this and more, for an indisputably personalized product.
